Smart Home Automation System

"Empower Your Living Space with Seamless Automation"

The Smart Home Automation System is designed to streamline home management by enabling effortless control over various devices. From managing roles to scheduling and diagnostics, this system empowers you to interact with your home like never before. All accessible from a single dashboard tailored to your needs.

Key Features

Manage Devices

Control and monitor all connected devices with ease from a single interface.

User Roles

Assign roles to users, including Admin, Homeowner, and Technician, for secure access control.

Scheduling

Automate device actions by setting specific times or recurring schedules.

Diagnostics

Run diagnostic tests on devices to ensure optimal functionality and identify issues.

Alerts and Notifications

Receive real-time alerts and notifications for important events and updates.

Benefits

Effortless Control

Manage your home's functionality from a centralized platform.

Enhanced Security

Role-based access ensures safety and control over home devices.

Energy Savings

Optimize energy usage by scheduling device actions for efficiency.

Real-Time Alerts

Stay informed of system events and alerts for better control.
